PROFESSIONAL SUMMARY

Information Systems undergraduate at Institut Teknologi Sepuluh Nopember with experience in secure web application development, system analysis, IT infrastructure, and IT GRC/cybersecurity fundamentals. Experienced in translating user problems into requirements, BPMN, SRS, application architecture, and API/database workflows. Applied security practices including role-based access control, authorization checks, input validation, and SQL injection risk mitigation across internal and public-facing web applications.

CORE SKILLS

IT GRC and Cybersecurity: Role-Based Access Control, Authentication, Authorization, Input Validation, SQL Injection Mitigation, Secure API Integration, OWASP ZAP, PortSwigger, Cybersecurity Fundamentals, IT Risk Awareness
Infrastructure & Deployment: Docker, AWS EC2, Redis, Linux, Web Server, Computer Networking,
Deployment and Infrastructure: Docker, AWS EC2, Redis caching, Linux, web server, computer networking, deployment monitoring fundamentals
Web Development and Integration: Next.js, Vite, HTML, CSS, Tailwind CSS, Material UI, shadcn/ui, REST API integration, AI API integration, debugging, frontend QA
Programming and Tools: Python, Java, C++, ROS, Dart, Git, GitHub, Figma

EDUCATION

Institut Teknologi Sepuluh Nopember – S-1 Sistem Informasi | Surabaya, Indonesia | 2023 – Present

- GPA: 3.74 / 4.00; Department of Information Systems.

SMA Negeri 87 Jakarta – Mathematics and Natural Sciences | Jakarta, Indonesia | 2023

CERTIFICATIONS

- Cisco Networking Basics - Cisco, 2025.
- Introduction to Cybersecurity - Cisco, 2025.
- Introduction to Information Security - Cyber Academy Indonesia, 2024.
- Dart Programming - Dicoding Indonesia, 2024.

PROFESSIONAL EXPERIENCE AND PROJECTS

PLN Internal Web Application Project – Web Application Developer / Part-time | Surabaya, Indonesia | Mar 2026 – Present

- Participated in PLN internal web application projects, including BESTIE (<https://bestie-app.anargya.fun/>) and LISSA (<https://lissa-app.anargya.fun/>).
- Selected application architecture and developed web app features, including AI API integration with database-backed application workflows.
- Implemented secure application controls, including role-based access control, authorization checks, input validation, and database query handling to reduce SQL injection and unauthorized access risks.

Beta-U – Frontend Developer / Contract | Surabaya, Indonesia | Mar 2025 – Present

- Handled frontend development for Conation (<https://www.conation.co.id/>) by converting UI designs into

responsive web pages and integrating required application flows.

- Develop web interfaces using Next.js and Tailwind CSS, integrate pages with backend APIs, and resolve functional or UI bugs during development.
- Coordinate with design and backend teams to ensure implementation aligns with user requirements, usability expectations, and delivery standards.

PT Sucofindo – Information System Department Intern | Surabaya, Indonesia | Jan 2026 – Feb 2026

- Created Software Requirement Specification (SRS) documentation for a project monitoring system.
- Mapped business processes to identify workflow needs, improve traceability, and support system design decisions.
- Designed UI/UX concepts to communicate proposed features and project monitoring flows to stakeholders.

PT SAC Inspirasi – Frontend Developer / Part-time | Surabaya, Indonesia | Aug 2025 – Jan 2026

- Built responsive and interactive web application interfaces using Vite, Tailwind CSS, and Material UI.
- Integrated APIs, debugged frontend issues, and supported website performance optimization in collaboration with design and backend teams.

Institut Teknologi Sepuluh Nopember – Assistant Lecturer, IT Infrastructure | Surabaya, Indonesia | Aug 2025 – Dec 2025

- Prepared practicum modules and teaching materials covering Linux, web servers, IoT, and computer networking.
- Guided students during lab sessions and demonstrated IT infrastructure concepts through hands-on implementation and troubleshooting.

TECHNICAL LEADERSHIP AND ADDITIONAL WEB PROJECTS

HMSI ITS – Research Technology Application, Expert Staff | Surabaya, Indonesia | Jan 2026 – Present

- Develop and maintain HMSI internal and external web platforms while coordinating requirements with other departments.
- Deployed web applications using Docker on AWS EC2 and implemented Redis caching to improve application response time and reduce loading delays for internal and external users.
- Improve interface quality, perform troubleshooting, and support secure application usage through role-based access and validation-aware development practices.

ISE! 2025 – IT Development Vice Director | Surabaya, Indonesia | Sep 2025 – Dec 2025

- Led IT Development for a 16,000+ user event platform by defining system architecture, selecting the tech stack, managing development workflow, coordinating QA, and tracking delivery through task tickets.

Imajas ITS – Head of Web Development | Jakarta, Indonesia | Oct 2024 – Oct 2025

- Led web development activities, including frontend implementation, bug fixing, website optimization, integration, deployment, and cross-division coordination.

TEDx ITS 2025 and Ini Lho ITS 2025 – IT Development Expert Staff | Surabaya, Indonesia | Sep 2024 – May 2025

- Implemented responsive pages using Next.js, Tailwind CSS, shadcn/ui, and animation libraries; fixed bugs and integrated API-based features including admin dashboard/detail flows.

AWARDS

- First Place, Department-level Programming Competition – Himpunan Mahasiswa Sistem Informasi ITS, Jun 2024.
